

The following bibliography lists those publications and off prints held by the National Pipe Archive as of April 2017.

The bibliography is divided into four main sections; UK, World (which are site specific), Wreck Sites, and tobacco/smoking related, which are not site specific. The UK section is organised in alphabetical order by county; the world section is in alphabetical order by country order.

Wherever possible a complete bibliographic reference has been given. In some cases, however, the archive does not hold all the information, such as volume number and page number. In those instances, an effort has been made to provide as much information as possible so that the reference is usable.

Each entry is followed by an NPA accession code, for example LIVNP 1997.17.2, this refers back to the pipe filing system and will help to locate each article.

The current list comprises all the published material held by the NPA. Please note that this is a working document and is constantly being updated. In future editions of this list it is hoped to include all the overseas publications, books, theses and trade catalogues held by the NPA.

In addition to those articles listed below the NPA holds files on clay tobacco pipes from over 380 sites across the British Isles. These include general details of pipes from whole counties to information about individual find spots.

To search the bibliography, use the "find" command by pressing Ctrl F, then type in your key word or subject.

PART 1: UK (Site specific)
